Data Engagement Platform

Allowing and easy access
to all the Project Information

A short explanation: **What is a Data Engagement Platform?**

CADMATIC eShare is offering a SVoT to navigate **any information** in a fully **integrated environment**

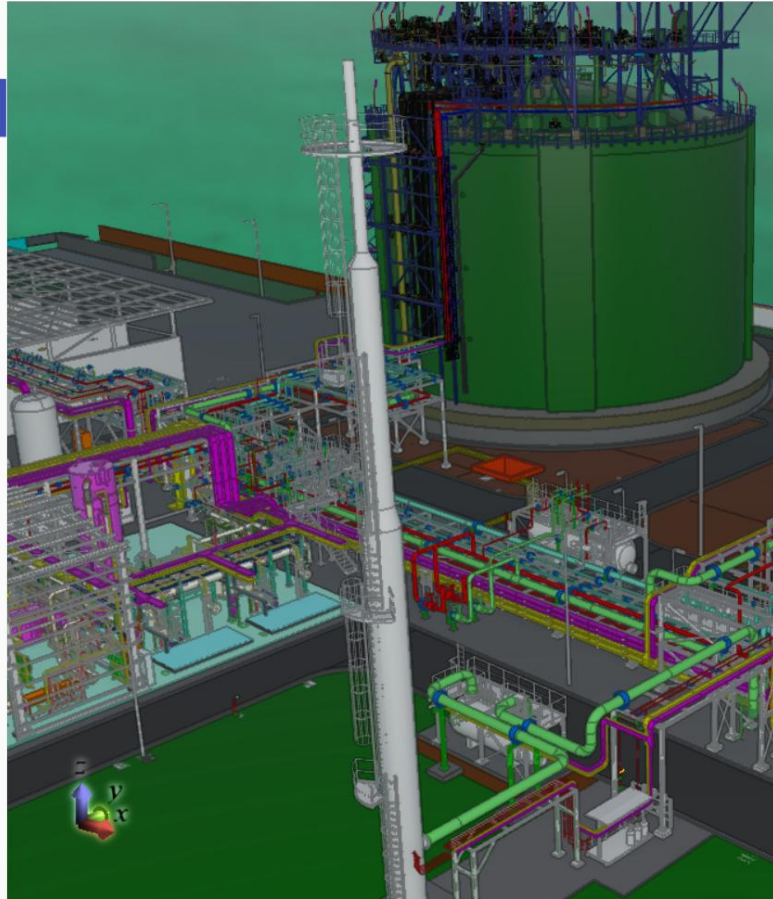

A short explanation: **What isn't a Data Engagement Platform?**

The logo consists of the letters 'eS' in a white, sans-serif font, centered within a rounded square. The background of the square is a vibrant orange color, overlaid with several lighter, semi-transparent orange curved lines that create a sense of motion or data flow.

CADMATIC eShare
circumvent the **Data**
Warehouse
approach, as the
need to use the ETL
process

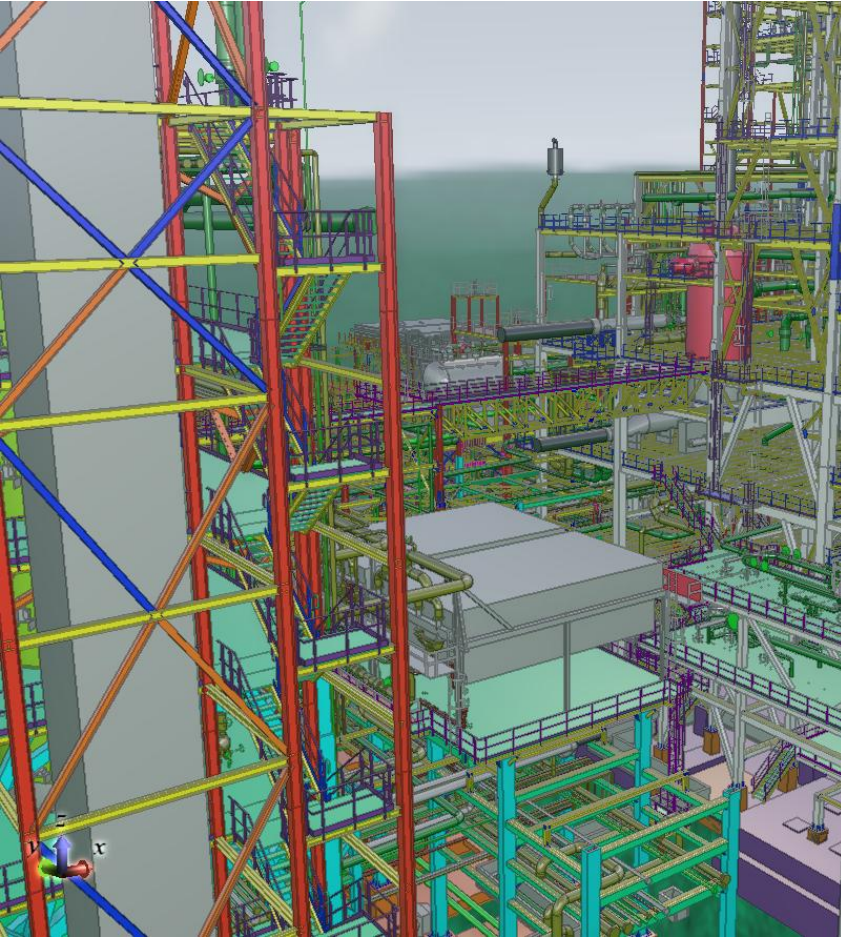

O/O projects challenge: **Manage the complexity with eShare**

**Don't mind about
the source files!**

Any 3D model any 2D drawing any
data could be used without
limitations

O/O projects challenge: **Manage the complexity with eShare**

**Don't mind about
the hardware in
use!**

Incredible performances empower
the ability to navigate any model on
any hardware!

 **CADMATIC**

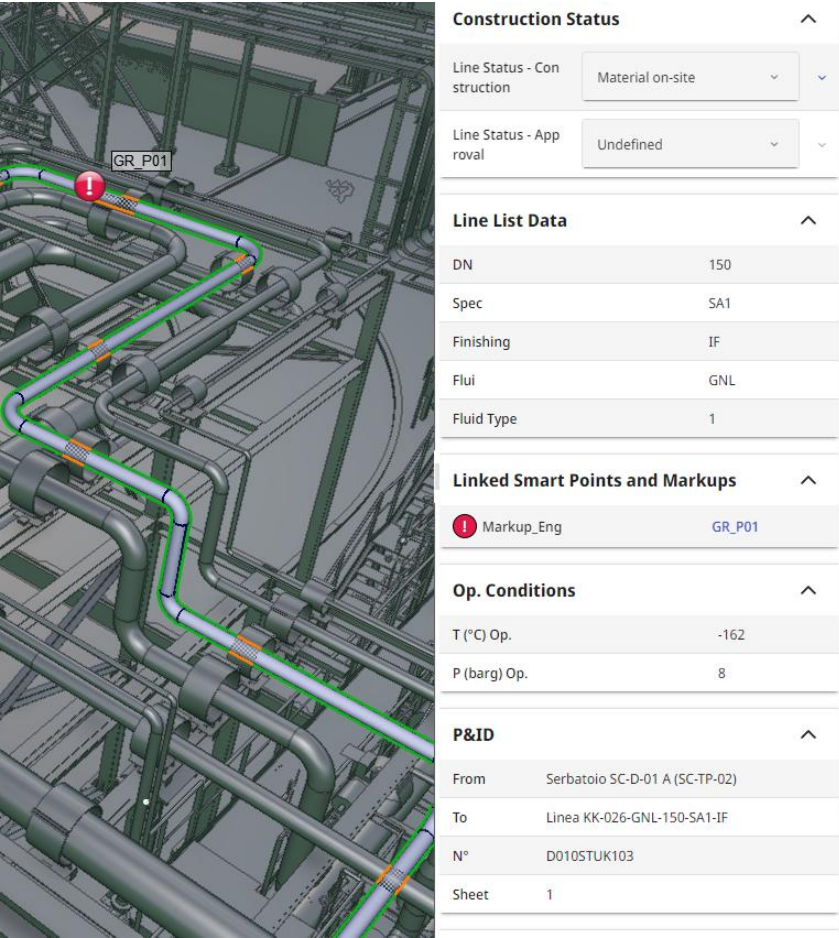

O/O projects challenge: **Manage the complexity with eShare**

Plant access for anyone, anywhere!

Navigate the model with the app or within a browser, configure adequate permissions for users, as offering the possibility to navigate off-line

O/O projects challenge: Manage the complexity with eShare

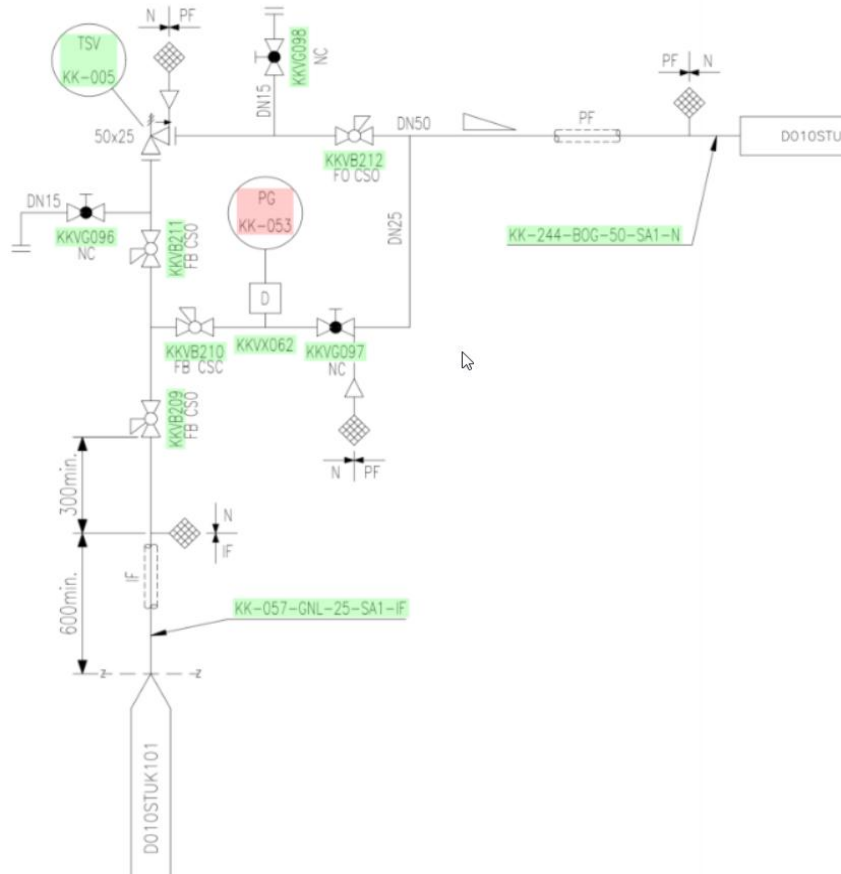

All the information at your fingertips!

Browse any information interfacing any document or drawing or DB, the Document Management system, the planning solution (Primavera P6, MS Projects, ...), any Excel file in use

O/O projects challenge: Manage the complexity with eShare

Data Quality under control!

Automate the controls of data consistency and automate the generation of reports, reducing the time to validate Data Quality

O/O projects challenge: Manage the complexity with eShare

Share any comment and the proposed solution!

Sharing the comments and the solutions is a key to optimize the performance in your project

O/O projects challenge: Manage the complexity with eShare

The best Dashboard you may have: your 3D model!

Visualize the quality of your data and your precious information in the 3D, by coloring and creating hierarchies

O/O projects challenge: Manage the complexity with eShare

Report the issues in
the punch list
without effort!

It will be possible to report the issues
from the Construction Site and get
the punch list updated automatically

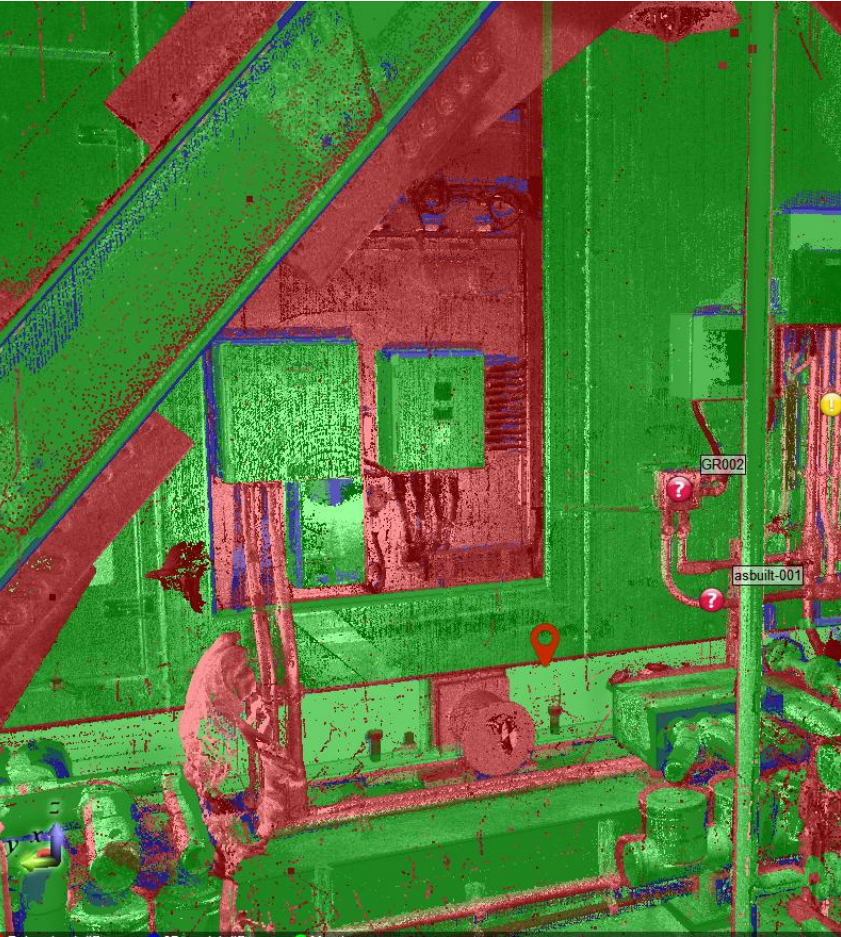

O/O projects challenge: **Manage the complexity with eShare**

**Visualize the
progress and
control the update!**

The planning and progress data will be available in the model and will show the actual up-to-dated status

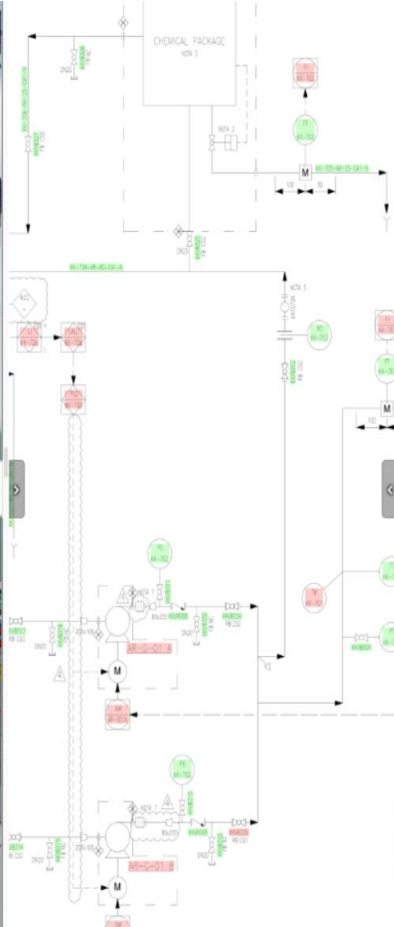

O/O projects challenge: **Manage the complexity with eShare**

As-built model in a breeze!

Showing all the information and issues, as comparing the model with a laser survey, the as-built model will be achieved in an effortless way

O/O projects challenge: **Manage the complexity with eShare**

**Receive digital
handover of your
plant!**

You will have the native option to handover all the data in a digital platform to be used at the plant
