

6th Next GEN

Chemicals & Petrochemicals Summit 2026

9-10 JULY, 2026 | THE LEELA MUMBAI

REACT. CREATE. INNOVATE.

REACT.CREATE.INNOVATE.

- Three-step blueprint for modern chemical advancement, focusing on sustainable practices, and disruptive technologies
- Acts as a guiding narrative to align research, industry scaling, and commercialization

REACT

Focuses on industry's need to react rapidly to global market shifts, supply chain vulnerabilities, and tightening environmental regulations

Reacting proactively by implementing inherently safer chemistry, reducing derivatives, and utilizing green catalysts

CREATE

Creating novel materials from renewable feedstocks and establishing closed-loop systems to minimize waste

Fostering a culture where entrepreneurs and researchers can build and scale new biochemical products

INNOVATE

Applying automation, Artificial Intelligence, and Digital Twins to accelerate reaction optimization and process modelling

Driving massive, long-term industry transformations, such as scale-up of mega-plants for green hydrogen, zero-carbon manufacturing, and alternative fuels

REACT

What's Happening Globally

Increased Geopolitical Tension

Chinese Overcapacities

Feedstock Security

Supply Chain Disruption

Currency Fluctuation

Green Chemistries

CREATE

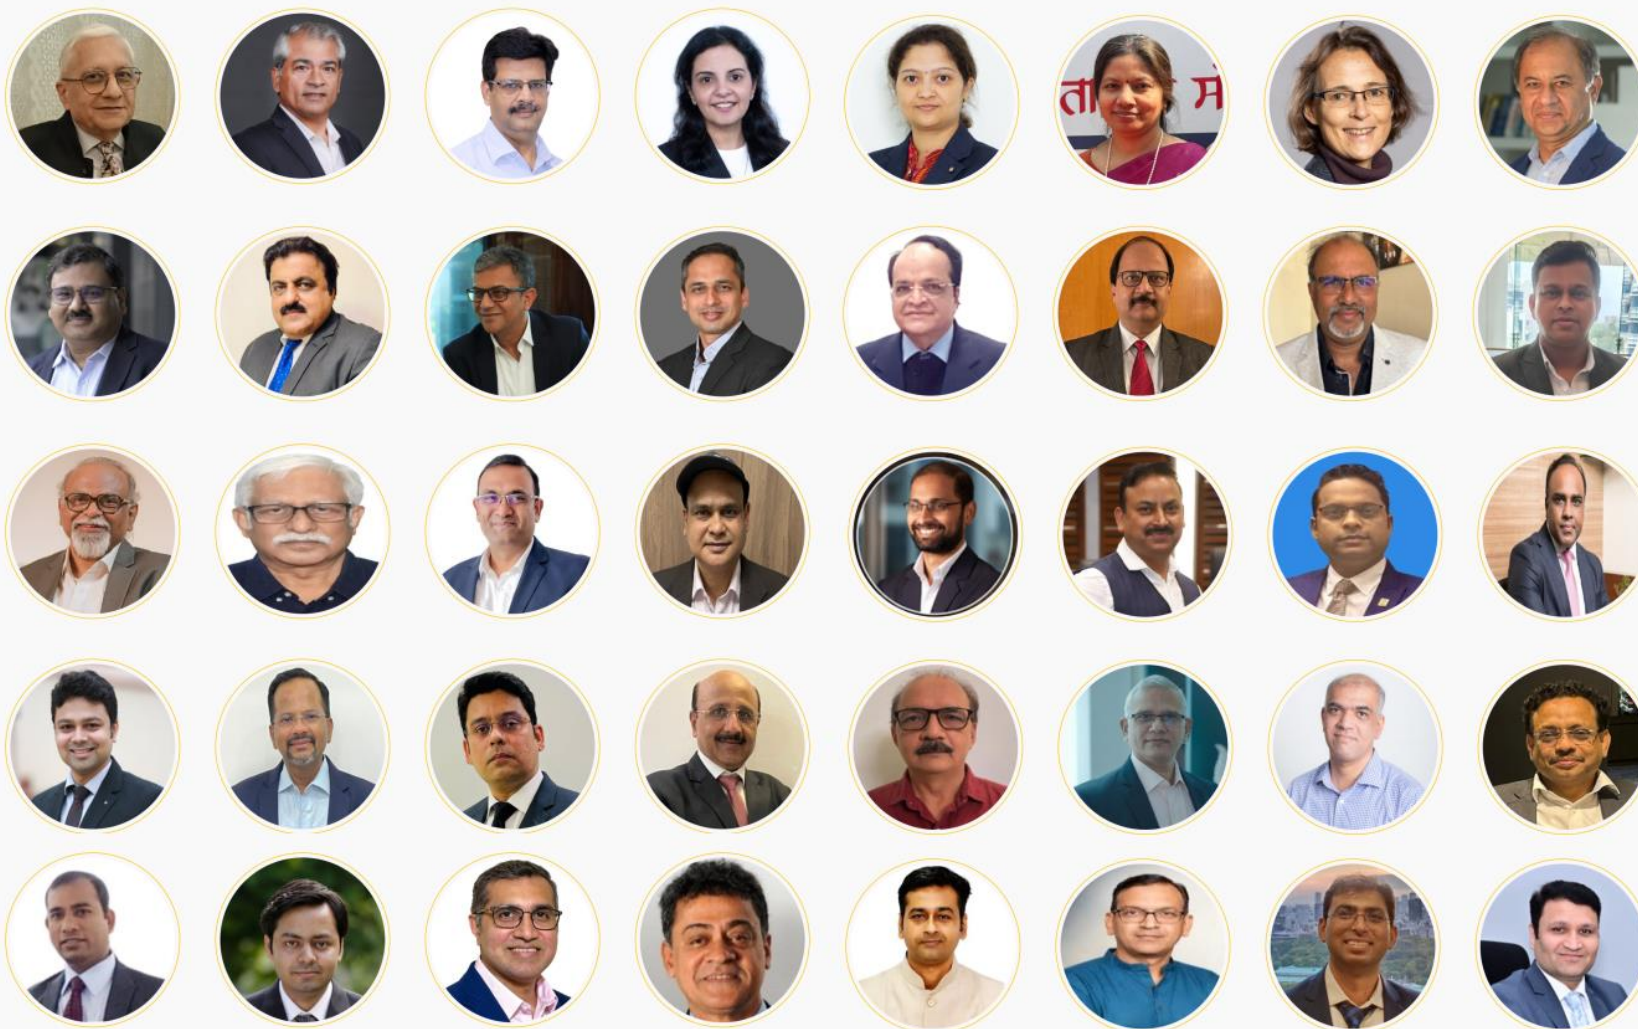

Focus of Indian Chemical Companies

- Increase Capacities
- Focus on Diversified Supply Chain Portfolio
- Increase Focus on Green Chemistries
- Dwell on Specialities Chemistries related to Semicon, Solar, Battery, Electronics, Medical Devices, and Composite Materials
- Creating Feedstock Redundancy

INNOVATE

- **New Product Focused on Sustainability**
- **Strengthen Collaboration between Industry-Academia**
- **Increase Spend on Innovation**
- **Lab to Factory Floor (Commercialisation)**
- **Acquiring New Technologies**
- **Global Partnerships**

Galaxy of Speakers

Galaxy of Speakers

ChemPharma **R&D** SUMMIT 2026

October 27-28, 2026

Courtyard by Marriott Mumbai
International Airport, Mumbai

**Innovation, Digital Transformation,
and Sustainability**

HYDROGEN INDUSTRY OUTLOOK 2027
